

SiS315 Games List

1. Purpose:

The purpose of this games list is to focus on the quality of games using SiS 315 based cards and provides end-users with references about the best choice of games for SiS 315.

As there are some compatibility issues for VGA Card, games, and motherboard, SiS have added test consoles to improve the validity of the games list. Regretfully, it is impossible to ensure that the games that have been listed in this document will have no problem on different platform.

The games list will include new games, which may be sold in Taiwan. **This document is a reference.** As it is impossible to ensure that the normal release has no problem, but SiS will update it accordingly.

2. Testing Environment

a. M/B Environment:

Mother Board	ASUS P4B (Intel 845)	System Size	Memory Buffalo PC-133 256MB SDRAM CL=2

3. Testing Step:

- a. Disable “3D Stereo” and “OSD” functions. Install the game
- b. If the game has “change modes” option, change every mode and check the display is correct.
- c. Press “Alt + Esc” to back to window mode, then change the desktop resolution, and then select the game process to go back to game mode. Do this step for 5 times.
- d. Exit the game and verify it can exit normally and there is no corruption appeared.
- e. Enable “Setting Manager”, "3D Stereo" and “OSD” functions, and enable all hotkeys in OSD
- f. Should load saved data. Verify Setting Manager loads the correct data.
- g. Check if there is any corruption when starting the game.

- h. Play game for 5 minutes. Check if the stereo function could work or not.
- i. Verify all hotkeys in OSD to see if it works or not.
- j. Press “Alt + Esc” to back to window mode, then change the desktop resolution, and then select the game process to go back to game mode. Do this step for 5 times.
- k. Exit the game. If the game is no included in the Setting Manager game list, then, it should be saved by Setting Manager
- l. Check it can exit the game normally and no corruption occurs.

4.Test Result:

The following list shows item means:

- 1. **Game No:** Game number.
- 2. **Game ID:** The game’s serial number, we follow RCT’s serial number.
- 3. **API:** The game title supports 3D API, if there is not any API support, the game is 2D game. **D3D: Direct 3D,OpenGL: SGI Open GL, GLide: 3dfx Glide.**
- 4. **Game Title:** The game’s CD title name.
- 5. **V.Chip:** VGA Chip version.
- 6. **Driver:** Tested VGA driver version.
- 7. **Result:** The **Pass** or **Fail** means whether the game plays normally under SiS315.
